

Tray Shortidge
Tech Services...

It was about 4:57 when I saw that Superman Cath Wiggins on the Ride was not coming down... I went to the ride and that's when I saw what happened to the girl, I was with David and he helped me open the lap bars to get people out of the ride... About 15 mins after we got there they let us get the people out of the ride, and then David had to get the girls foot from the top of the traps and then we put her foot in a bag of ice...

After that we turned off Ride and put a lock out on the main Power Supply to the Ride...
