

David Lindsay Tech. service.

As I arrived on scene of incident E.M.T's were treating a teenage girl on gondola #3 seat #1.
I sent Troy S. into mechanical room to insure ride was E. stopped & secure as I called John schmitt.

Once we determined ride was secure I left container and asked Kevin Washam what he needed. I was told to stand by - when the emergency team was ready to release guests. Troy S. energized the ride and manually released all guests & the injured girl. Once everyone was released from ride. Troy S. turned ride off.

Kevin Washam waved me out of mechanical room & asked me to help locate injured girls missing foot. Someone located it on top of shade structure that surrounds tower.

I went to pump house next to tower got a ladder & retrieved foot from on top of shade structure & put Ice.

I sent Troy S. to another ride that needed assistance & I retrieved my lock out tag out & locked out ride & did not touch anything else.
