

Produce Storage Tips

When you buy Kentucky Proud, you're not only getting fresh, healthy, flavorful fruits and vegetables grown locally, you're also helping your community and farm families throughout the Commonwealth by keeping your dollars close to home.

> Properly storing your food reduces waste from spoilage, decreases the risk of foodborne illness, and ensures your farm-fresh food tastes great!

Place in a Cool, Dark Spot:

Basil, Berries, Cantaloupe, Corn, Eggplants, Garlic, Onions, Peaches, Pears, Potatoes, Plums, Squash, Sweet Potatoes, Tomatoes, Watermelon

Best Practice:

Use berries on the countertop within 1-2 days. If longer, store in the fridge.

Refrigerate in Crisper Drawer or Container:

Apples, Asparagus, Beans, Beets, Bok Choy, Brussels Sprouts, Cabbage, Carrots, Cauliflower, Celery, Cilantro, Cucumbers, Greens, Kohlrabi, Mushrooms, Okra, Parsley, Peas, Peppers, Radishes, Turnips

Trim the leafy tops off and then refrigerate:

Don't throw away your leafy tops; use them in pesto, soups, and even salads.

Chef Tips:

Only wash your produce when you're ready to eat it! Washing early will cause the produce to spoil faster, especially berries and stone fruit.

Be sure to remove any rubber bands from your herbs and leafy greens. These break down the cells and can cause your produce to go bad faster!

Blanche and freeze vegetables you can't eat right away to preserve nutrients and enjoy the taste of summer all year long. To blanche, boil the whole or cut pieces of the vegetable for 12 minutes and then immediately place in ice cold water to stop the cooking process. This will keep your vegetables from getting freezer burn. Frozen vegetables will keep for up to a year. Freezing is not recommended for artichokes, Belgian endive, eggplant, lettuce greens, potatoes (other than mashed), radishes, sprouts,

Seasonal Produce Guide
