

Commercial Availability Search

Commercially available has been defined by the National Organic Program (NOP) as the ability to obtain a production input in an appropriate form, quality, or quantity to fulfill an essential function in a system of organic production or handling, as determined by the certifying agent in the course of reviewing the organic plan.

Please complete this form and include EACH §205.606 National List nonorganic agricultural ingredient used in products labeled “organic.” This document must accompany your OSP Commercial Availability when submitting to the office. Operations are required to update commercial availability information at least on an annual basis.
