

# STAY VIGILANT

Look out for the invasive **Yellow-Legged Hornet**

## EMBRYO NESTS

March - June

**Description:** Papery; ping pong ball to tennis ball sized.

**Where to look:** Houses, structures, low to the ground.

## PRIMARY NESTS

May - August

**Description:** Softball to basketball sized.

**Where to look:** Houses, structures, short bushes or trees (6-25 feet).

## SECONDARY NESTS

June - November

**Description:** Basketball to car tire sized.

**Where to look:** Tall trees (80-90 feet).

## LOW-ACTIVITY PERIODS

December - February

Hornet activity decreases in winter. Please report suspected nests even if no hornets are present.
